Is LASIK Safe & What Can I Expect?

YOU SEE RESULTS

LASIK is remarkably safe. Indiana LASIK Centers has developed a thorough preoperative evaluation protocol, a rigorous planning process, and multiple levels of safety built-in during the laser procedure itself.

In less than 15 minutes our experienced LASIK eye surgeons can make your dream of enjoying life without being dependent on glasses a reality. Individual results will depend on your current vision, along with the structure of your eye. Before scheduling a LASIK procedure, we will perform an examination and discuss expectations with you.

Most people are able to return to work and resume normal activities as soon as the next day.
