Prior To The Procedure

1. Start oral Vitamin C 500mg twice daily

Postoperative Eye Drop Regimen (Wait at least five minutes in between drops)

Moxifloxacin

This is an antibiotic drop used to prevent infection after surgery. Use one drop in the operative eye(s) four times per day until bottle is empty.

Bromfenac 0.09%

This is a non-steroidal anti-inflammatory drop used to decrease inflammation and to reduce pain. Use one drop in the operative eye(s) twice daily until the bottle is empty.

Pred Forte

This is a steroid solution used to decrease inflammation and regulate healing. Use one drop in the operative eye(s) four times daily for one week and then twice daily for four additional weeks.

TheraTears (Preservative Free Individual Use Vials)

This is a preservative free lubricant eye drop that is necessary to keep the eyes lubricated and to aid the healing process. Use one drop every two hours after PRK for two months, followed by four times daily for six additional months.
